Klaten, Indonesia | [+6285155158457](tel:+6285155158457) | [dickaismaji@gmail.com](mailto:dickaismaji@gmail.com) | [linkedin.com/in/dickaismaji](https://linkedin.com/in/dickaismaji) | [github.com/dicka88](https://github.com/dicka88)

Web Developer with 5+ years of experience specializing in building modern, high-performance web applications. Proficient in developing scalable frontend architectures using Next.js, React, Tailwind CSS, and TypeScript, and experienced in backend development with Laravel and MySQL/PostgreSQL. Skilled in consuming and integrating RESTful APIs, implementing real-time features with WebSocket, and transforming Figma designs into responsive, pixel-perfect UIs. Familiar with testing frameworks like Vitest and Jest, version control using Git, and CI/CD deployment via Vercel. Strong understanding of clean code principles, modular design, and agile workflows.

## WORK EXPERIENCE

---

### Front-end Lead

Mar 2024 - Present

PT. Sonar Analitika Indonesia (Dataxet:Sonar) - Full Remote

- Architected scalable frontend architecture using Next.js, modular component design, and clean code practices.
- Maintained and structured GitHub repositories, managed PR workflows, and enforced branching strategies.
- Led code reviews to ensure code consistency, performance optimization, and adherence to ESLint/Prettier standards.
- Built robust unit and integration test suites with Vitest and Jest to ensure frontend stability.
- Managed CI/CD deployments using Vercel, handling environment variables, staging previews, and custom domains.
- Project planning, feature scoping, and key technical decisions.

### Sr. Front-end Developer

Nov 2022 - Mar 2024

PT. Sonar Analitika Indonesia (Dataxet:Sonar) - Full Remote

- Developed advanced UI features using Next.js, Tailwind CSS, Redux, and TypeScript.
- Developed reusable UI patterns with Tailwind CSS, and managed complex state logic using Redux Toolkit.
- Converted Figma designs into pixel-perfect, fully responsive UIs with cross-browser compatibility.
- Integrated dynamic data with RESTful APIs, ensuring smooth and reliable data flow.
- Integrated real-time features using WebSocket and RESTful APIs in close collaboration with backend engineers.
- Built interactive dashboards and visualizations using Highcharts for real-time data display.

### Front-end Developer

May 2022 - Nov 2022

PT. Sonar Analitika Indonesia (Dataxet:Sonar) - Full Remote

- Built responsive, UI-accurate components from Figma using Next.js and modern frontend tools.
- Integrated data from RESTful APIs and handled basic asynchronous data flow.
- Applied Yup for form validation and followed clean code practices and project conventions.
- Collaborated with the team on feature development, bug fixes, and code reviews.
- Participated in sprint discussions and improved frontend skills through hands-on experience.

## Fullstack Web Developer

Apr 2020 - Oct 2021

CV Karya Hidup Sentosa (Quick Traktor) - Onsite

- Developed and maintained internal web applications including ERP for Human Resources to manage employee data, attendance, and payroll.
- Built and improved features on Tokoquick, an internal inventory and sales platform.
- Wrote complex SQL queries for reporting and system automation using MySQL/PostgreSQL.

## Internship Web Developer

May 2019 - Apr 2020

CV Karya Hidup Sentosa (Quick Traktor) - Onsite

- Assisted in developing and maintaining internal applications using CodeIgniter and Vue.js.
- Contributed to HR ERP modules and internal tools, focusing on UI and data handling.
- Wrote SQL queries and supported bug fixing, testing, and feature enhancements.

## EDUCATION

---

### Universitas Mercu Buana Yogyakarta

2023 - 2027 (Estimated)

Information Technology (Undergraduate)

### SMK N 2 Klaten

2016 - 2020

Computer and Network Engineering

## PROJECTS

---

### Among Us Icons

A resource platform providing various character icons, skins, and pets from the game Among Us. Users can search, preview, copy, and download these assets.

### Propil

A web application that allows users to easily create and publish personal resume websites. This platform provides an intuitive interface for inputting personal information, work experience, education, skills, and projects, as well as offering publication features to share resumes online.

### Todo Daily

A daily task management application that helps users organize and track their to-do lists. This application features user authentication, enabling a personalized experience for efficiently managing daily tasks.

### Crypto Galaxy

A cryptocurrency mining platform offering various investment packages with potential profits, daily payouts, and long-term contracts. This project emphasizes low costs, guaranteed security, and 24-hour customer service to attract users interested in crypto mining.

## SKILLS & INTERESTS

---

**Skills:** Next.js, Tailwind CSS, TypeScript, Redux Toolkit, RESTful API, WebSocket, Laravel, MySQL, PostgreSQL, Figma to Code, Responsive & Pixel-perfect UI, Vitest, Jest, Git, Vercel.

**Interests:** Software Engineer, Product Management, DevOps, IT Audit
